H.M THAMINDU KAVINDA DINUJAYA

Data Science Undergraduate | Data Analytics | Machine Learning | AI | BI

Padukka, Sri Lanka | +94 775771560 | thaminduofficial5@gmail.com | www.linkedin.com/in/thamindu-kavinda | https://github.com/Thamindu16 | https://thamindu16.github.io/My-Portfolio/

PROFESSIONAL SUMMARY

Final-year BSc (Hons) Data Science undergraduate with hands-on experience in Python, SQL, data analysis, machine learning, data visualization, and AI-based applications. Experienced in data cleaning, exploratory analysis, statistical analysis, customer segmentation, dashboard development, predictive modelling, and developing data-driven applications. Interested in Data Science, Data Analytics, Business Intelligence, Machine Learning, and AI, with a focus on transforming raw data into actionable insights and practical solutions. Available immediately for internship.

TECHNICAL SKILLS

- **Programming & Query Languages:** Python, SQL (MySQL, SQLite)
- **Data Analysis & Engineering:** Pandas, NumPy, Data Cleaning, EDA, ETL, Data Transformation, Data Quality, SQL Analytics
- **Machine Learning:** Scikit-learn, Classification, Regression, Feature Engineering, Model Evaluation
- **Data Visualization & BI:** Power BI, Tableau, Matplotlib, Seaborn, Dashboard Development
- **AI & Application Development:**LLMs, RAG, FastAPI, REST APIs
- **Databases:** PostgreSQL, MySQL, Supabase
- **Statistics:** Descriptive Statistics, Correlation Analysis, Hypothesis Testing
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code

PROJECTS

E-Commerce Data Engineering & Analytics Platform — Ongoing
(Python, PostgreSQL, SQL, Apache Airflow, Docker, Power BI, Tableau)

- Developing an end-to-end e-commerce data platform covering data ingestion, transformation, validation, database loading, analytics, and business intelligence.
- Building a Python-based ETL pipeline to process and transform raw e-commerce datasets into analysis-ready data.
- Designing a PostgreSQL database to organize customer, order, product, payment, review, and seller information for analytical workloads.
- Implementing automated data-quality checks covering missing values, duplicates, invalid records, and data consistency.
- Developing SQL-based analytical workflows for revenue, customer, product, sales, and operational performance analysis.
- Building automated pipeline orchestration using Apache Airflow and containerized development environments using Docker.
- Developing interactive dashboards in Power BI and Tableau to communicate business KPIs and data-driven insights.
- GitHub: https://github.com/Thamindu16/ecommerce-data-pipeline-project

Retail Sales & Customer Insights Dashboard
(Python, Pandas, SQL, Power BI)

- Cleaned 1,067,371 raw transaction records into 779,425 analysis-ready records using Python and Pandas, reducing noise by approximately 27%.
- Performed SQL-based analysis across 36,969 orders to evaluate revenue, sales performance, customer behaviour, and country-level performance.
- Identified the UK as the highest-revenue market, generating 82.8% of total revenue (£17.37M), while 72.4% of customers were repeat buyers.
- Applied RFM analysis to segment customers into five groups and identify customer retention opportunities.
- Developed a two-page interactive Power BI dashboard with KPI cards, eight-plus visualizations, and country-level filtering for business reporting.
- GitHub: https://github.com/Thamindu16/retail-sales-analytics-project

TruthLens – Fake News Detection System
(Python, Scikit-learn, FastAPI, TF-IDF)

- Built a Logistic Regression classification model using TF-IDF features to classify news articles as real or fake.
- Developed and deployed a FastAPI backend on Render to serve real-time predictions through an API.
- Integrated a web interface hosted on GitHub Pages to allow users to submit news content and receive classification results.
- Implemented prediction confidence scores to communicate model output to users.
- GitHub: https://github.com/Thamindu16/Fake-News-Detetction-System-Project

EDUCATION

BSc (Hons) in Data Science
Sri Lanka Technology Campus | 2023 – 2027 (Expected)
CGPA - 3.04/4.0

G.C.E. Advanced Level — Engineering Technology Stream
Badulla Central College | 2014 – 2022

CERTIFICATIONS

- HackerRank SQL - Basic , Intermediate , Advanced
- IBM SkillsBuild – Machine Learning for Data Science Projects
- Amazon Web Services (AWS) - Fundamentals of Machine Learning and Artificial Intelligence
- Amazon Web Services (AWS) - AWS Cloud Practitioner Essentials
- Microsoft Learn — Get Started Building with Power BI
- Microsoft Learn — Discover Data Analysis

EXTRA ACTIVITIES

IEEE Computer Society of SLTC — Assistant Webmaster / Executive Committee Member
Aug 2025 – Aug 2026

- Maintain the society's official website and support technical, project management, and digital activities.

IEEE Student Branch of SLTC — Design Team Deputy
Aug 2024 – Jan 2025

- Supported event coordination, digital content, broadcasting, and technical activities.
