PROFESSIONAL SUMMARY

I am Thamindu Kavinda, a passionate 4th-year Data Science undergraduate at SLTC with a solid foundation in machine learning, statistics, and data visualization. With hands-on experience in building predictive models and practical AI solutions, I am eager to step into the industry to learn from real-world projects, collaborate with professionals, and grow as a data scientist.

EDUCATION

Bachelor of Science (Hons) in Data Science 2023 - 2027
Sri Lanka Technology Campus

Badulla Central College 2014 - 2022

TECHNICAL SKILLS

Programming Languages - Python , Java , Dart

Data Visualization - Power BI , Matplotlib , Seaborn , Pandas , NumPy , Matplotlib

Tools & Technologies - Jupyter Notebook , VSCode , Google Colab , MySQL , Docker , AWS

Databases – MySQL , MongoDB

Frameworks – Flask , Flutter

Version Control – Git , GitHub , DAGsHub

PROJECTS

BillFold – AI-Powered Financial Statement Analysis Application (Ongoing)

Technologies - Flutter , Dart , FastAPI , Python , LLMs , RAG , Supabase

Developed an AI-powered mobile application to analyze financial documents and generate intelligent insights using LLMs and Retrieval-Augmented Generation (RAG). Implemented secure PDF processing, AI chat, and financial analytics features.

GitHub Repo - https://github.com/Thamindu16/billfold-application-fyp

AI Agent – Intelligent Conversational Assistant (Ongoing)

Technologies - Python , FastAPI , LLMs , LangChain

Developed an AI-powered conversational assistant capable of understanding user queries and generating context-aware responses using Large Language Models and LangChain.

GitHub Repo - https://github.com/Thamindu16/AI-Agent

Fake News Detection System

Technologies - Python , Scikit-learn , FastAPI , TF-IDF , Logistic Regression , HTML , CSS , JavaScript

Developed a machine learning-based web application to classify news articles as real or fake using TF-IDF vectorization and Logistic Regression. Built a FastAPI backend for real-time news prediction.

GitHub Repo - https://github.com/Thamindu16/Fake-News-Detetction-System-Project

MindCare - Mental Health Support Platform

Technologies - React Native, Node.js, Express.js, MongoDB, Machine Learning / AI, REST APIs, Git

Developed a responsive web application for mental health support, featuring self-assessment tools, personalized recommendations, and real-time tracking. Built secure RESTful APIs to manage user data and power seamless user interactions.

---

EXTRA ACTIVITIES

IEEE Computer Society of SLTC

Assistant Webmaster (Aug 2025 - Present) | Member (Jan 2025 - Aug 2025)

Collaborated as an Executive Committee member to maintain the society's official website. Volunteered in project management and graphic design to drive community initiatives, promote tech-sharing, and enhance overall member engagement.

IEEE Student Branch of SLTC

Design Team Deputy (Aug 2024 – Jan 2025) | Volunteer (Aug 2023 – Aug 2024)

Collaborated with the Design Team to create digital content, event graphics, and promotional materials for IEEE activities. Contributed to event coordination, graphic design, live broadcasting, and technical support to enhance member engagement and the success of student branch initiatives.
