PROFESSIONAL SUMMARY

I am Thamindu Kavinda, a passionate 4th-year Data Science undergraduate at SLTC with a solid foundation in machine learning, statistics, and data visualization. With hands-on experience in building predictive models and practical AI solutions, I am eager to step into the industry to learn from real-world projects, collaborate with professionals, and grow as a data scientist.

EDUCATION

Bachelor of Science (Hons) in Data Science	2023 - 2027
Sri Lanka Technology Campus	
Badulla Central College	2014 - 2022

PROJECTS

Fake News Detection System

GitHub Repo: github.com/Thamindu16/Fake-News-Detection-System-Project

Technologies Used: Python, Machine Learning (Scikit-Learn), Natural Language Processing (NLP), NLTK / TF-IDF, Pandas, NumPy, Git

Key Responsibilities & Achievements:

- **Model Development & Architecture:** Designed and implemented an end-to-end Machine Learning pipeline to accurately classify news articles as authentic or misleading using Natural Language Processing (NLP) techniques.
- **Text Preprocessing & Feature Extraction:** Applied NLP techniques including tokenization, stop-word removal, and TF-IDF vectorization to convert raw text data into meaningful numerical features for model training.
- **Algorithm Implementation & Evaluation:** Trained and evaluated multiple classification algorithms (such as Logistic Regression, Passive Aggressive Classifier, or Naive Bayes) to optimize accuracy and minimize false positives.
- **Data Processing Pipeline:** Cleaned and structured large-scale text datasets using Pandas and NumPy, ensuring balanced class distribution and robust model performance.

AI Agent Project (Ongoing)

GitHub Repo: github.com/Thamindu16/AI-Agent

Technologies Used: Python, OpenAI API / LangChain / Hugging Face, LLMs, REST APIs, Git

Key Responsibilities & Achievements:

- **Autonomous Agent Design:** Developed an end-to-end AI agent capable of multi-step reasoning, task decomposition, and autonomous decision-making to handle complex user queries.
 - **LLM & Tool Integration:** Integrated Large Language Models with custom functions and external APIs, allowing the agent to retrieve live information and perform automated actions.
 - **Context & Memory Management:** Implemented short-term and long-term conversational memory architecture to maintain contextual awareness across extended interactions.
 - **Performance Optimization:** Leveraged advanced prompt engineering and error-handling mechanisms to ensure accurate outputs, lower hallucination rates, and reduce query latency.
-

EXTRA ACTIVITIES

IEEE Computer Society of SLTC

Assistant Webmaster (Aug2025-Present) | Member (Jan2025-Aug2025)

Collaborated as an Executive Committee member to maintain the society's official website. Volunteered in project management and graphic design to drive community initiatives, promote tech-sharing, and enhance overall member engagement.

TECHNICAL SKILLS

Programming Languages - Python , Java , C++ , Flutter , Dart , SQL

Data Visualization - Power BI , Matplotlib , Seaborn

Tools & Technologies - Git/GitHub , Jupyter Notebook , VSCode , Google Colab , MySQL

REFERENCE

Dr. Chameera De Silva , PhD (UniMelb)

Head of the Department - Data Science / Lecturer

FOCIT - Faculty Industry Placement Coordinator
